

The Food Bank is offering food pantries a FREE electronic intake system called **Service Insights!** By joining this initiative, your pantry will have access to the intake website, where you can securely store neighbor info you're already collecting!

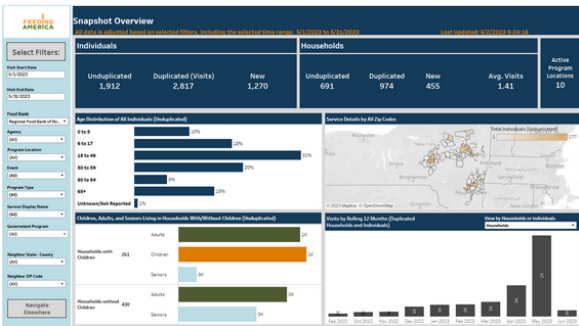

This means faster service and no more giant paper binders!

The system is web-based and can be accessed from virtually any device. If you don't have internet or equipment at your program, we can help! Please contact us to discuss options.

What you need to know:

1

When neighbors visit your distribution, you can collect important data with intake questions. This data is stored securely for an easy intake process when they return.

Data turns into insightful reports about your community and who you are serving. This helps with grants and funding for your program!

2

3

So many more additional features including Digital USDA/TEFAP Forms, Reservations, ID Cards and flexibility to use inside or outside!

Our Current Network Has:

39

Agencies

13,241

Households Registered

64,358

Visits Processed

*as of 5/1/2024
