

Service Insights on MealConnect (SI-MC) is the recommended distribution and intake software for our partner agencies. It is a FREE no-cost system available to all member agencies.

SI-MC electronically and securely stores neighbor data on a shared network. This means neighbors can visit multiple pantries without having to answer intake questions each time. It also means faster service and no more giant paper binders or outdated databases! The software is web-based and can be accessed from virtually any device. If you don't have internet at your program, that's okay! Please contact us to discuss options.

What you need to know:

1

When neighbors visit your distribution, you can collect important data with intake questions. This data is stored securely for an easy intake process when they return.

Data turns into insightful reports about your community and who you are serving. This helps with grants and funding for our agencies!

2

3

So many more additional features including Reservations, Digital USDA/TEFAP Forms, and flexibility to use inside or outside!

Our Current Network Has:

38

Agencies

11,514

Households Registered

52,651

Visits Processed

*as of 4/1/2024
